# PAWLING IS AGAIN CHOSEN PRESIDENT OF M. A. A. A. A. U.

Meeting at Engineers' Club Is Re-elected Leader for Ensuing Year.

J. H. Alcorn, chairman of the Crosscountry Championship Committee of the Middle Atlantic Association of the Amateur Athletic Union, after last night's annual pow-wow of the meeting held at the Engineers' Club, stated that the junior and dale championships would in all probability be held about Thanksgiving pay. He has also planned the senior race to be held a couple of weeks later, This announcement will be very interesting to the athletics of this section, who will be advised to start training at once. Another matter of interest that occupled the attention of the delegates at hat night's session was the fact that there is inadequate facilities for the proper encouragement of track and field athletics here. It is a known fact that there are few places where the boys may gather and train. In this great city there should be plenty of vacant spots where an up-to-date athletic field could be developed. Point Breeze course and the one at Central Park are the only ones where track sport may be promoted for open competition. Surely there some one who can come to the aid the runners and Jumpers and give them a place to enjoy the social, as well physical, benefits. At the two parks named intoxicating liquors are sold, and there was a petition filed last night ask-

As was expected, there was no opposition to the re-election of last year's of ficers. The following re-elections took place: George F. Pawling, president Fred F. Bauer, vice president; Herman Meyer, secretary and treasurer, and Peter P. Carney, handicapper,

ing the Registration Committee to refuse

a sanction for games held at such places.

Action was deferred until the incoming

The Registration Committee is formed of the following: Herman Meyer, Denny Buck Steele and Satton. The delegater to the national meeting in November will be John R. Tuylor, Pittaburgh; J. T. Farrington, Reading, and Messrs, Pawling, Meser, Sutton and Bauer. The alternates are Messrs, Carney, Kirkpatrick, Burke, Denny, Alcorn and Braden.

The association voted \$100 to be sent to New York as a testimonial to be used in the erection of a monument to the memory of James E. Sullivan, who re-

The report of Handicapper Peter P. Carney was meet interesting, and he had many wise words to say. He is of the opinion that the park owners in Phila-delphia should encourage athletics by putting in proper places of training for the athletes. He also thinks that by interestthe various fair associations of this state and adjoining ones stimulus would be given athletic activity.

Fred A. Cady is to be the official handi supper of all swimming events, and will be in direct touch with Pete Carney at

President Pawling is eager to make the mains year the most successful one in he history of Middle Atlantic athletics, and urges the athletes and officials to do their part. Officials should report on time for the games and the athletes hould send in their blanks early in order hand capper.

Reports from Pittsburgh, Reading tranton. Trenton and other places boasting commissioners were most pleasing. Pittsburgh takes the palm, for at that athletic centre great things have been accomplished.

The matter of carrying the baton in The matter of carrying the haton in relay races was also discussed. That is a matter for the national body to consider, and the local delegates will take that matter up at the New York meeting.

EALD MA Whether the Middle Atlantic Association Is to carry the dead burden of registering the Catholic Amateur Athletic League athletes is another matter for the parent organization to determine, against the further encouragement of the A A. I. off members who are not

# SWARTHMORE TEAM HAS STARTED TO WORK IN EARNEST

At Last Night's Annual Though Weather Is Not Conducive to Best Training Work, Coaches Put Proteges Through Hard

> SWARTHMORE, Pa., Sept. 22.-The first workout of the season was given the Garnet squad this morning, when more than 45 candidates reported to Coaches Gieg and Dr. Mercer. Only light work was indulged. A scrimmage will be held Thursday.

Seven of last year's team reported and it will take some hustling on the part of the new candidates to win places. The place which is causing the most anxiety on the part of the coaches is centre, as a new man will have to be developed before the first game with Villanova. October 3. The material is accredited by all the coaches and Captain Ben Clime as being the best to enter college in many years. Many of the new men are entering with excellent records which promise success for the season.

The slogan is to "Beat Pennsylvania" on October 31 and then on to Haverford as the big objective point on November 21. This is the first clash between these old Quaker rivals in ten years and Haverford will be looking for revenge for the defeat of 1904.

The University of Virginia will make its first appearance in this section for many years when it comes to Swarthmore, November 14. Revenge will be its aim also, as the game of 1911 resulted in a victory for Swarthmore, 9 to 8.

Since Coach Bob Maxwell will have four veterans from last year to begin with in Pete Hunter, "Jud" Endicott, "Pat" McGovern and "Tom" McCabe, two ends must be developed. Captain Clime, MacKissick and "Porky" Murch form a nucleus for the back field. These three men are all excellent kickers, so that department will be stronger than

After First Day on Street Has Such Bodies and They Tell of Desire of Traders to Get Into Market. Their Decisions, Generally Speaking, Inspire Confi-London May Reopen.

Bond salesmen who have been permitted to go on the street and canvass for new business are reporting to their houses Commission regulation of public utilities a fairly brisk demand for both the listed and unlisted securities. Getting in direct touch with the individual investors who has grown so extensively in the last year or two that it is now one of the most deal in small lots, they naturally are able to judge the situation outside the broker-age offices. And, in a general way, they important problems with which the publice service corporations of the country have to deal. Virtually every State in are reporting existence of a returned con-fidence which they declare is almost everywhere apparent. the Union has a regulatory commission

These commissions and their relation to investors and public utility companies are discussed in an article in the Magazine of Wall Street by Arthur St. George Joyce, financial editor of the Evening LEDGER, in which these facts are emphasized:

"Commission regulation of public utilities has been discussed from many ingles, and in the final analysis the judgment of those who know has almost universally been that where this regulation is equitably enforced and the regulatory acts are of a kind which inspire confidence, both from the general public and the utilities, such commissions are of material benefit to all concerned.

which are in many instances in excess of those which ruled under the depressing closing markets. This condition, natu-rally, offers much encouragement to the supervising committees and to brokers generally. It is being used as a bull "There has been a great deal of regulation within the last few years. Figures argument for some action looking to a show that an average of one State a month enacted laws last year creating GOLD POOL A FACTOR.
Foreign exchange, that determining factor which is just now of such great these commissions. Supervision by State and municipal governments seems to be importance, still maintains an casier tendency and another drop in rates is the order of the day. Government ownership is talked of in many sections, and some municipalities have gone into \$100,000,000 gold pool and larger grain and cotton shipments are having a good effect abroad and the cables tell of an the business of operating street railway. electric light and power plants.

"The utility corporations do not object to regulation by State or municipality. On the other hand, they welcome it. Experience has shown that in most of weeks. In brief, the object of the pool is to provide a means not only of prethe States wherein this supervision is in force there has been a desire on the part of the commissioners to look at conditions in a common sense light, and give recognition to the fact that the corpora-First instalment of the pooled gold to be collected from the banks will be £25,-806,000. This will be deposited at first in New York, and will be transferred to Ottawa and paid over there to the agent of the Bank of England in such amount tions as well as the general public have rights which ought to be respected.

ACTS CONSIDERED FAIR.

"On the whole, therefore, the regulatory acts now in force are considered fair and reasonable to both the public be immediately drawn upon and offered on the market in sufficient volume to and the public service corporations. Where regulation is just and wisely administered, there develops a better feeling all around and there is added protection given the companies, the State or municipality, as the case may be, and the general public. In most of the States which have commissions, the one big advantage to the investing public from a relative in Scouland in which he was told that employes of one of the biggest shippards on the River Clyde had recently received in their pay en-velopes this notice: "There will be no which stands out prominently, is the power of supervision which these commissions have over the issuance of velopes this notice: "There will be no more work for you until the war is over. Your country needs your serv-ices." securities by the public service companies-a dangerous power, incidentally, when in the hands of an unskilled or partisan commission.

"Guess it's a case of fight or starve," commented the broker. "It is mandatory, in these States, for companies wishing to put on the market a security issue of any sort, to W. Clark & Co., was their accounts to investigation by the primarily responsible for the inaugura-tion of the hound show now being given in connection with the Bryn Mawr Horse commissioners. The latter go carefully into the financial condition of the com-pany to learn if the issue is warranted and, if so, to see that there is sufficien hounds as among the most representa-tive of their type in this country. security behind the issue to guarantee protection to investors who put their money into the new bonds or notes, or According to a wireless dispatch received in London, gold holdings of the imperial Bank of Germany on September 15 were 1.813,000,000 marks; notes in circulation, 1.003,000,000 marks; deposits, whatever form of security may be de-cided upon by the companies. In this way the State virtually indorses the securities so issued. The commission, if conditions warrant, puts its approval on the securities and when they are taker into the open market and traded in, they carry not only the indorsement of a reputable utilities company, but also the approval of the Commonwealth in seen at a glance what a henefit is the operation of such laws, to the public and to the companies.

ISSUANCE OF SECURITIES. "Bonds having behind them the inderse- April ment of a reputable commission inspire public confidence to a marked degree and are more easily disposed of because of this increased security. Such supervision by State commissioners precludes also the possibility of a corporation not financially sound putting into the open market an lasue of securities which

might result in financial loss to in-

Knot, Ky., southwest to Jelico, about 18 miles. Construction work will be started Most of the commissions have given "Most of the commissions have given ample evidence that they realize public utilities are a natural monopoly; that competition, with its resultant rate wars, and in the end inevitable combination onsideration the question of building a ombined passenger and freight station usually resulting in over-capitalization, is far less satisfactory from every stand-point than the proper regulation of one company protected during its growth. For this reason it has been the policy Sydney J. Clifford, head bookkeeper and statistician of the Boston and Maine Railstatistician of the Boston and Maine Rail-road, will leave the employ of that rail-road on October I, to become accountant for the Interstate Commerce Commission.

The final result is the protection The final result is the protection of public utility securities, and at the same time the gunrantee of fair rates and good service to the public.

Math, Henry Roeber, Albert Aston, Brooklyn, W. T. Hamton, New York city; T. F. Chauncy.

#### WHEAT TRADING SLOW WITH MARKET EASIER

Receipts Large at Leading Centres, Despite Gloomy Reports.

CHICAGO, Sept. 22. Trade in wheat was slow today and the market easy. There were few buying orders. Receipts were large at the leading centres, including but cars at Minneapolis and Dulith, against 942 cars a year ago; 1273 cars at Winnipeg, against 1127 cars a inth, against 947 cars a year ago; 1273 cars at Winnings, against 1177 cars a year ago, and 800 cars at Chicago, against 1611 cars a year ago. The easier tone was in the fave of reports of ready absorption abroad, continued cold. Wet weather in Europe and export sales in the last 24 hours of about 1,000,000 bushels at all points. It was apparent that shorts were nextly well observed. were pretty well covered

thy with wheat. The market at Buenca Aires was under measure on better weather in Argentina and larger ar-rivals. The Danuse shipped 390,000 bushels of corn in the United Kingdom, and North Africa nearly 20,000 hushels. sh. Prices and North Allies bord were its cars. The receipts bern today were its cars. Sec. 1, 200 100 in 5.40 000 Dustels, an increase of 266.000 bushels, an increase of 266.000 bushels for the week. There were FLOURS—Recipte 1175 bits, 1.280 160
the in such the such with one error with it important charge. White over \$1.000 in the work. There were important charge with the such \$1.000 in the work. There were the interest of \$1.000 in the work. There were important charges with the such \$1.000 in the work of expect of exp
